-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference signs 11 and 13. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: Brief description of Figure 4 is missing from page 2 of the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3728

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverberg (3,308,835). Silverberg '835 discloses a cosmetic compact comprising: a cover member (14); a base member (10); first means including a cover spring hingedly connecting said members together, said members having a closed position at which the members are in complete engagement causing the spring to be compressed, said members having an open position at which the spring expands causing the cover member to extend at approximately 90 degrees to said base member; said cover member having latch means disposed opposite to said first means; said base member having latch engagement means disposed oppositely to said first means; said latch means and latch engagement means being mutually engaged when the members are in closed position; when these means are disengaged, the spring expands and places the members in open position. See Figures 1-6 and column 2, lines 23-68.

With respect to claim 2, note the latch pin and recess in Figure 3 embodiment.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by McKnight et al. (1,709,182). McKnight '182 discloses a cosmetic compact comprising: a cover member (2); a base member (1); first means including a cover spring hingedly connecting said members together, said members having a closed position at which the members are in complete engagement causing the spring to be compressed, said members having an open position at which the spring expands causing the cover member to extend at approximately 90 degrees to said base member; said cover member having latch means disposed opposite to said first means; said base member having latch engagement means disposed oppositely to said first means; said latch

means and latch engagement means being mutually engaged when the members are in closed position; when these means are disengaged, the spring expands and places the members in open position. See Figures 1-3 and column 2, lines 83-105.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are compact's analogous to applicant's instant invention.
